Boeing to Showcase P-8, Other Advanced Products at Seoul ADEX 2017

SEOUL, KOREA, Oct. 13, 2017 –Boeing [NYSE: BA] will exhibit its industry-leading defense and commercial technologies, support and sustainment capabilities at the 2017 Seoul International Aerospace & Defense Exhibition (Seoul ADEX), October 17–22 at the Seoul Airport.

Boeing Defense, Space & Security will be part of two U.S. Navy-led briefings discussing the capabilities and operational performance of the P-8A Poseidon aircraft. The P-8 is the world's best multi-mission aircraft for anti-submarine warfare, anti-surface warfare, and intelligence, surveillance and reconnaissance missions. It's also highly effective at search and rescue and humanitarian missions and can operate in all environments. Visitors to the show will be able to see a P-8A Poseidon on static display.

Also on display at the Boeing booth will be a full-scale ScanEagle, an autonomous unmanned aerial vehicle developed and built by subsidiary Insitu Inc., and a long-duration, autonomous surface vehicle called the SHARC (Sensor Hosting Autonomous Remote Craft) developed by Boeing subsidiary Liquid Robotics. Other Boeing defense platforms on display at the show include the F-15K Slam Eagle in service with the Republic of Korea Air Force and the AH-64E Apache, and the CH-47 Chinook operated by the Republic of Korea Army.

Boeing Commercial Airplanes will highlight key commercial airplanes including the 787-9 Dreamliner and the 737 MAX, while also featuring a virtual reality (VR) tour of the innovative Boeing Sky Interior for both of these models.

“Boeing’s presence at the Seoul ADEX is a symbol of the strong partnership that Boeing and the Republic of Korea have established over the past 65 years,” said Eric John, president, Boeing Korea. “We have worked hard to sustain and strengthen this partnership and take pride in supporting the growth of the Korean aerospace industry.”

Randy Tinseth, vice president of Marketing, Boeing Commercial Airplanes, will also host a media briefing session to share the company’s 20-year commercial market outlook for Northeast Asia with a focus on the Korean market on Monday Oct 16, from 10:00 a.m. to 11:30 a.m. local time at the Boeing office in Seoul.

Boeing is the world's largest aerospace company and leading manufacturer of commercial jetliners, defense, space and security systems, and service provider of aftermarket support. As America's biggest manufacturing exporter, the company supports airlines and U.S. and allied government customers in more than 150 countries. Boeing products and tailored services include commercial and military aircraft, satellites, weapons, electronic and defense systems, launch systems, advanced information and communication systems, and performance-based logistics and training.

Boeing employs more than 142,000 people across the United States and in more than 65 countries. The enterprise also leverages the talents of hundreds of thousands more skilled people working for Boeing suppliers worldwide. In 2016, Boeing spent more than \$500 million with 35 Korean companies provide products and services for Boeing production and sustainment programs, research and development, and a broad range of internal services that support Boeing operations. Boeing remains committed to helping Korea address its industrial and technology development needs and has shown continuous and incremental commitment toward Korea, spending \$3.6 billion to date over the past 10 years.
